Adaptation Planning and Practices for Pennsylvania Forests

September 24: Preparing for Climate Change

Natural resource managers and landowners face the tremendous challenge of developing and implementing management actions that help ecosystems respond to climate change. This session will:

- § Provide information on the current and anticipated effects of climate change on Pennsylvania and its forests
- § Describe resources and tools that can be used to integrate climate change into management
- § Outline adaptation concepts and strategies in the context of sustainable forest management
- § Identify actions that enhance the ability of forests and other ecosystems to adapt to changing conditions
- § Highlight real-world examples of adaptation projects and engage in a variety of interactive activities to identify climate change issues and potential adaptation actions.

September 25: Forest Adaptation Planning & Practices

This active, hands-on training will be held on September 25th for a limited number of participants. Natural resource managers will incorporate climate change considerations and identify actions for adaptation into their own real-world forest management projects. Contact [Patricia Leopold](#) to request additional information or inquire about attendance.
