

Save the Date

San Bernardino Mountains Climate-Informed Vegetation Management Planning

Oct. 20th 2020: 1:00-3:00 pm PT

Oct. 27th & 29th 2020: 9:00-11:00 am PT

Virtual Workshop

The workshop will be held over three web sessions: we strongly encourage participants to attend all three.

Purpose & Objectives

Develop climate adaptation actions for a sample of project types within the broader San Bernardino Mountains area.

These demonstrations will be used in the Climate-Informed Vegetation Management Plan to show how to translate broad adaptation ideas for the San Bernardino Mountains area into specific, place-based actions.

We will use the Adaptation Workbook to:

- Outline goals and objectives for a sample project.
- Consider climate change impacts to the project area, and consider management challenges and opportunities.
- Develop specific, place based adaptation tactics.
- Discuss how different adaptation actions may apply to the broader San Bernardino Mountains area.

Workshop Details

Dates & Times:

- October 20th from 1:00 to 3:00 pm PT
- October 27th & 29th from 9:00 to 11:00 am PT

Please RSVP directly to Calendar Invites
