Virtual Webinar: October 6, 2022

In-person Workshop:
October 25-27, 2022

Rio Grande National Forest Adaptation Workshop

There is an increasing need to consider the effects of climate change on ecosystems and identify management actions that respond to these changes. This workshop will support participants from the Rio Grande National Forest in determining which climate impacts are of greatest concern to them, and identify management opportunities for adapting to change. The [Adaptation Workbook](#) provides a structured process for integrating climate change considerations into management planning and activities. Using this process, workshop participants will:

- Consider climate change impacts and vulnerabilities of South-Central Colorado, and how those might affect the ability to meet project goals and objectives.
- Identify adaptation actions that help address climate vulnerabilities while meeting goals and objectives.
- Discuss how to monitor adaptation actions for success.

Details

Pre-Workshop Webinar:

Thursday, October 6: 9-10:30 MT

In-Person Workshop:

Tuesday, October 25: 10 – 4:30 MT

Wednesday, October 26: 8 – 4:30 MT

Thursday, October 27: 8 – 3 MT (in-the field)

LOCATION: Rio Grande Water Conservation District
8805 Independence Way
Alamosa, CO 81101

Interested?

Please e-mail Judi.Perez@usda.gov or Courtney.Peterson@colostate.edu with your interest in attending the workshop no later than **Friday, September 30.**
